HIE – The Bridge to Interoperability Facilitating Meaningful Use and MACRA

Meaningful Use Today

- Although Meaningful Use regulations and penalties for Medicare ended for Medicare in 2016, it continues for Medicaid providers through 2021

- In 2017, providers must attest to the Modified Stage 2 (2014 CEHRT) measures or the Stage 3 measures (2015 CEHRT) to receive the Medicaid Incentive dollars (no associated penalty)

- In 2018, providers must attest to the Stage 3 measures (2015 CEHRT) to receive the Medicaid Incentive dollars (no associated penalty)

CEHRT is Certified EHR Technology

Meaningful Use – Modified Stage 2 Measures

1. Protect Patient Health Information
2. Clinical Decision Support
3. CPOE
4. Electronic Prescribing (eRX)
5. **Health Information Exchange**
6. Patient Specific Education
7. **Medication Reconciliation**
8. Patient Electronic Access (VDT)
9. Secure Messaging (EPs only)
10. **Public Health and Clinical Data Registry Reporting**

➢ Must report CQMs

Meaningful Use – Stage 3 Measures

1. Security Risk Assessment
2. ePrescribing
3. Clinical Decision Support (2 measures)
4. Computerized Physician Order Entry (3 measures)
5. Provide Patient Access
    1. Patient Education
    2. Provide Patient Access – Portal
6. Patient Engagement
    1. VDT
    2. Secure Messaging
    3. Patient Engagement – Patient-Generated Health Data
7. Public Health and Clinical Data Registry Reporting
    1. Public Health Registry
    2. Electronic Case Reporting
    3. Syndromic Surveillance Reporting
    4. Immunization Registry
    5. Clinical Data Registry
8. Health Information Exchange
    1. Request/Accept Summary of Care and incorporates within CEHRT
    2. Send a Summary of Care
    3. Clinical Information Reconciliation

MIPS Components 2017

MIPS	Quality	Improvement Activities	Advancing Care Information	Cost
	60%	**15%**	**25%**	**0%**
	Replaces PQRS.	New Category.	Replaces the Medicare EHR Incentive Program also known as Meaningful Use.	Replaces the Value-Based Modifier.

Advancing Care Information Component 2017

Base: **Required or 0 on ACI**
1. Security Risk Assessment
2. ePrescribing
3. Provide Patient Access
4. Health Information Exchange

Performance: **Capped at 100 out of 160 possible points**
1. Provide Patient Access - **Double**
2. Health Information Exchange - **Double**
3. View, Download, Transmit
4. Patient Education
5. Secure Electronic Messaging
6. Medication Reconciliation
7. Immunization Registry
8. Syndromic Surveillance Reporting Registry
9. Specialized Reporting Registry

Advancing Care Information Component - 2018

Base: Required or 0 on ACI

1. Security Risk Assessment
2. ePrescribing
3. Provide Patient Access
4. Health Information Exchange – Send Summary of Care
5. Health Information Exchange – Receive (Accept/Request Summary of Care

Performance: Capped at 100

1. Provide Patient Access - Patient Education
2. Provide Patient Access – Portal
3. Patient Engagement – VDT
4. Patient Engagement – Secure Messaging
5. Patient Engagement – Patient-Generated Health Data
6. Public Health and Clinical Data Registry Reporting – Public Health Registry
7. Public Health and Clinical Data Registry Reporting – Electronic Case Reporting
8. Public Health and Clinical Data Registry Reporting – Syndromic Surveillance Reporting
9. Public Health and Clinical Data Registry Reporting – Immunization Registry
10. Public Health and Clinical Data Registry Reporting – Clinical Data Registry
11. Health Information Exchange – Request/Accept Summary of Care
12. Health Information Exchange – Send a Summary of Care
13. Health Information Exchange – Clinical Information Reconciliation
